### **DETAILED ACTION**

1. Claims 4, 6-22, 24-31 and 37 were examined and allowed.

#### ***Reasons for Allowance***

2. Claims 4, 6-22, 24-31 and 37 are allowed. The following is an Examiner's statement of reasons for allowance: Claims 4, 6 and 8, of this type of simulation process (i.e., process conducted on an electronic-based computer), are considered allowable as per MPEP § 2111.01, In re Sneed, 710 F.2d 1544, 1548, 218 USPQ 385 (Fed. Cir. 1983), since none of the references of record alone or in combination disclose or suggest the combination of limitations specified in the independent claims.

#### ***Examiner's Amendment***

- The previous abstract was deleted and replaced with the following --

The present invention pertains to the field of electronic design automation (EDA).

More particularly, this invention relates to using coherent state among multiple simulation models within an EDA simulation environment. Two related inventions are described. One invention selectively activates certain simulation domains in an

electronic design automation (EDA) simulation environment at various times during the simulation of a circuit design and maintains timing synchronization among the various domains. The other invention makes state information accessible to simulation models in an EDA simulation environment without the necessity of simulating data transfers in the simulated circuit design. In various embodiments, the inventions increase efficiency and versatility of a simulation environment. --

- Specification, pg. 5, line 3, after "09/883,838" the phrase -- issued U.S. Patent 7,260,517 -- was inserted.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
